PROMOTING HEALTH AND ENVIRONMENT THROUGH A SYNERGY OF MAN AND LAND
KHAHARE, KATHMANDU, NEPAL EST. 2008

05/15/2015

Dear friends,

we would like to thank you heartily for your contributions and aid. With your donations we have been able to help many people. The following images show the ongoing work around the foundation carried out by us. 14 huts for 14 families have been built so far, and water has been distributed to over 25,000 people every day since the earthquake hit. Corrugated sheets, bamboo and tents have also been distributed in order to erect the huts for needy families by themselves.

KRMEF Carpenter, our German volunteer Aurel and teacher building a shed.

Sumitra, our workshop lady, on a building mission.

A German volunteer, Tatijana, helping with construction together with Nepali team.

Local lady, whose house collapsed, asking Krishna if they can do something for her.

KHAHARE, KATHMANDU, NEPAL EST. 2008

A local man showing Krishna his collapsed house

A single mother, whom has been seeking the help of the foundation

A local lady, Roita, got injured during the second earthquake.

Bamboos and corrugated sheets being carried to Bosan, the village above Khahare.

More damages were caused by the earthquake on May 12th.

Measurements are being taken before the construction of a new shed.

The next stage

Having supported the local communities with their primary needs for the first weeks, it has now come the time to move onto another phase of our project.

In this second stage, our focus is to help rebuilding safe, sustainable homes in our village. The traditional houses will be rebuilt using eco-friendly technologies and materials; they will be more resilient and less likely to collapse outright. Our rebuilding program will not only be as environmentally friendly as possible, but also cost effective and economically sound, to ensure the long term sustainability of our project.

Sunita and Swasthika, with their mother and grandmother standing outside their damaged house.

We have always been very supportive with the neediest people of our community. Sunita and Swasthika (see picture) have been supported for their entire education; cures and medicines for their grandmother have also been sponsored by the foundation. We are now taking the lead to build this family a new house; the first of the many homes KRMEF is intending to build for the local community in Khahare. The foundation is now working to estimate the cost required to build a house.

Another important step, will be stocking up our clinic with pharmacs, bandages etc. to set up our mobile health clinic in order to be able to treat erathquake survivors and provide emergency medical care not just in our village, but in many other areas that have been badly affcted by the erathquake.

Over the past 3 weeks we have been able to help many people, however there is a lot more to be done. Over the next few months we will work hard to rebuild and revitalise our community, but goodwill alone will not be enough. Please continue supporting us and help us to publicize our mission.

Please see the details for donation below.....
